

# VEGUEROS

**Flavour profile:**           **Medium to full**

Vegueros translates into English as 'farmers' and these cigars have happily maintained their rustic edge. The name of each new vitola also draws inspiration from the Cuban farmers' vocabulary.

Originally introduced to the market in 1996 as a full flavoured tribute to the countless generations of men and women that have cultivated tobacco in the world-famous plantations of Pinar del Rio, the brand was relaunched in 2013 with a new medium-to-full bodied blend, new sizes and presented in unique tins of 16 cigars.

All sizes of Vegueros are 'tripa larga, totalmente a mano,' – long filler, totally handmade.

## **The Range**

### **Entretiempos**

This stout cigar delivers the intense and unique Vegueros taste in a format made famous by the Montecristo Petit Edmundo, released in 2006. Available in smart tins of 16 cigars and packs of 4.

### **Mananitas**

This unique size is named after the small leaves, and the first ones to be picked, found at the foot of Cuban tobacco plants. An affordable way to enjoy some of Cuba's finest tobacco.

### **Centrofinos**

The 'Centrofinos' is a classification for the leaves of the sun-grown tobacco plant harvested from around mid-way up the plant. This cigar is a unique size within the Habanos portfolio and the largest of the Vegueros range. It is presented in tins of 16 and packs of 4.
